**DETAILED ACTION**

***Amendment submitted 12/17/01***

Amendment submitted 12/17/01 has not been entered in its entirety. The amendment at page 3, lines 3-14 has not been entered because the replacement paragraph did not match the existing paragraph.

Applicant has not submitted a marked-up version of amendments to the specification. A marked-up version is required. See 37 CFR § 1.121.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 62-81 and 82-99 are rejected under 35 U.S.C. 102(b) as being anticipated by TOI (GB 2 283 425 A). Toi discloses a syringe, guard 2, shield 1 that slides relative to the guard and locks via detents 7, 8 in guarded and unguarded positions. The proximal end of the guard has lateral surfaces that substantially enclose a recess at the proximal end. A locking mechanism 5 with tapered proximal edges and blunt distal edges is capable of substantially permanently receive the lip of the syringe. See figs. 3, 5,6. Detents on the body and guard form detents and pockets to lock the shield in positions. See figs. 4a-4d.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 62-99 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No. 6,344,032; claims 1-7 of U. S. Patent No. 6171283; and claims 3, 5, 6 of U. S. Patent No. 6171283. Although the conflicting claims are not identical, they are not patentably distinct from each other because they all recite a syringe, guard, shield that slides relative to the guard and locks via detents in guarded and unguarded positions. The proximal end of the guard has lateral surfaces that substantially enclose a recess at the proximal end and a locking mechanism.
